FUDA EMPIRICAL EVALUATION
Development Experience Questionnaire (Used Templates)

NOTE: This is a fillable PDF file. If you are not using a PDF writer, please make sure to print this file to a PS or PDF file to not lose the information.

Name: S10   Date: 24 Aug 08

Concept: ☐ JFace – Context Menu ☐ JFace – Content Assist

☑ Eclipse – Navigate ☐ Eclipse – Table Viewer

Q.1: Were you able to implement the concept successfully? ☑ Yes ☐ No

Q.2: How much time did you spend on the concept's implementation? 35 mins

Q.3: If not successful to implement the concept, what was the main reason in your opinion?

☐ Lack of experience.

☐ Not a useful template.

☐ Not useful sample applications.

☐ Complexity of the concept.

☐ Other. Please specify: _____

Q.4: Did you refer to the example applications' source code to implement the concept?

☐ No. None of them. ☑ Yes. One of them. ☐ Yes. Both of them.
Please specify: KTreeMap

Q.4.1: If yes, for what program statements and what kind of information?

1

Q.5:   Overall, did you find the templates useful? If yes, in what way? If not, why?

At the beginning I wanted to rely only on the templates, but there were many false positives, and things didn't become clear enough until I have looked into one of the samples. Differences with the Java language, and the SomeClass and someMethod can be confusing in the beginning.

Q.6:   Do you think that the format and structure of the templates are OK? If not, what are the main issues?

No

Q.7:   What kinds of information do you think are missing in the templates?

Q.8:   Overall, in the range of 1-5, how do you rank the provided template in terms of usefulness to implement the concept?

☐ 1 = Not Useful   ☐ 2   ☐ 3   ☑ 4   ☐ 5 = Excellent

Q.9:   Do you have any additional comments on this experiment?

I think to prove the value of templates, it is needed that those who try to use it should use it for a longer time then the payoff, if any, would be much clearer to measure and appreciate.
