

FUDA EMPIRICAL EVALUATION

Development Experience Questionnaire (Used Templates)

NOTE: This is a fillable PDF file. If you are not using a PDF writer, please make sure to print this file to a PS or PDF file to not lose the information.

Name: S28 Date: Aug. 22, 2008

Concept: JFace – Context Menu JFace – Content Assist
 Eclipse – Navigate Eclipse – Table Viewer

Q.1: Were you able to implement the concept successfully? Yes No

Q.2: How much time did you spend on the concept's implementation? 18 minutes

Q.3: If not successful to implement the concept, what was the main reason in your opinion?

- Lack of experience.
- Not a useful template.
- Not useful sample applications.
- Complexity of the concept.
- Other. Please specify: _____

Q.4: Did you refer to the example applications' source code to implement the concept?

No. None of them. Yes. One of them. Yes. Both of them.
Please specify: _____

Q.4.1: If yes, for what program statements and what kind of information?

The context menu was not showing up using the template. So I searched both sample projects and found that the template did not mention that you needed to call setMenu on the Control object. Both projects did this.

Q.5: Overall, did you find the templates useful? If yes, in what way? If not, why?

The template was useful because it was focused and concise. I did not need to filter through unrelated information.

Q.6: Do you think that the format and structure of the templates are OK? If not, what are the main issues?

I had no problem with navigating and understanding the templates. A superior template would provide hot links in the template that would bring you directly to the sample project context.

Q.7: What kinds of information do you think are missing in the templates?

When several options were presented for a method call (using the || notation) I found that I wanted to consult a JavaDoc to see what the difference between the multiple calls were.

Q.8: Overall, in the range of 1-5, how do you rank the provided template in terms of usefulness to implement the concept?

1 = Not
Useful

2

3

4

5 =
Excellent

Q.9: Do you have any additional comments on this experiment?

Additional Space:
